EDUCATION

Computer Programming Diploma • GPA: 3.95 / 4.0, Dean's List all terms.	Algonquin College	2023 - 2025
Bachelor of Arts - Psychology	Carleton University	2016 - 2021

EMPLOYMENT

Freelance Full Stack Developer Production Application: https://www.mszensemporium.com/	2026 - Present
---	-----------------------

- Designed and developed a production full-stack web application using React, TypeScript, Vite, Node.js, Express, and SQLite.
- Collaborated with stakeholders to gather requirements, define user stories, and translate business needs into technical specifications.
- Built a secure admin system with JWT authentication with secure HTTP-only cookies, bcrypt password hashing, and protected API routes.
- Implemented full CRUD functionality for product management via RESTful APIs and a custom admin dashboard.
- Architected a layered backend structure (routes, services, repository pattern) to improve maintainability and separation of concerns.
- Integrated frontend and backend using Axios, including file upload functionality handled by Express middleware and dynamic data-driven UI components.
- Configured authentication middleware, environment variables, and CORS policies to ensure application security.
- Deployed and maintain a production application actively used by the client, using a decoupled frontend/backend architecture and independently managing hosting, APIs, environment variables, and infrastructure.

Customer Sales Associate	The WoodSource	2021 – 2022
---------------------------------	-----------------------	--------------------

- Built Excel-based automation tools using VBA macros to improve pricing accuracy and reduce manual processing time.
- Managed end-to-end order workflows across in-store, phone, email, and Shopify channels, ensuring accurate data entry and timely fulfillment.
- Coordinated between sales, production, and operations teams to align order requirements, timelines, and delivery constraints.
- Translated customer requirements into structured order specifications, ensuring clarity between client needs and internal execution.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, HTML, CSS, Bash

Frontend: React, Vite, Axios, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Cookie-Based Authentication, Bcrypt

Databases: SQLite, MySQL, PostgreSQL

Testing: Jest, JUnit, Pytest

Tools: Git, Linux, Postman, Gradle, Maven, Jira, PGAdmin, MySQL Workbench

Concepts: CRUD, REST APIs, MVC Architecture, Repository Pattern, Agile Development

PROJECTS

Java 2D Tiledmap Level Editor

2025 – Present

<https://gitfront.io/r/DanBlais5078/GQo8fRVkMkSd/ProjectMageLite/>

- Developed a 2D tile-based level editor in Java using LibGDX for a custom game engine workflow.
- Implemented project saving and loading functionality to persist and restore complete level data.
- Built a tileset system supporting image loading, parsing, and automatic tile slicing for editor use.
- Designed a multi-layer scene system allowing separation of terrain, objects, and background tiles.
- Implemented interactive grid-based tile placement tools including placement and removal functionality.
- Developed support for tile animation and real-time rendering updates within the editor loop.
- Structured the application using MVC architecture and an ECS-based design to manage editor state and rendering logic.
